

ABSTRACT OF THE DISCLOSURE

A method for selecting images from a plurality of images obtained from a digital device for printing with an imaging apparatus, includes the steps of printing a thumbnail printout, the thumbnail printout including a plurality of thumbnails corresponding to the plurality of images; generating a selection sheet from the thumbnail printout by placing a first designation mark on the thumbnail printout for
5 each thumbnail of the plurality of thumbnails corresponding to each image of the plurality of images on which a first action is to be taken; detecting the first designation mark by scanning the selection sheet with the scanner; printing a confirmation for confirming to a user that each image on which the first action to be
10 taken is designated; and performing the first action based on detecting the first designation mark.
